
Solvent Naphtha

Specification

Property	Norm	Test Method
Appearance	Colorless or yellowish transparent liquid	GOST 2706.1-74
Density at 20 °C g/cm ³ , min	0,820	GOST 3900-85
Volatility, xylene scale, max	2,5	Clause 9.2. TU
Water-soluble acids and alkalis content, %	0	GOST 5985-79
Mechanical impurities and water content,%	0	GOST 6370-83

Safety requirements: 1. Solvent naphtha is a substance of the 3rd class of hazard (moderately hazardous substances). 2. Solvent naphtha is a combustible liquid. Flash point – 17-20 °C, self-ignition temperature – 350 °C.

Transportation: By railway and motor transport in tank cars or sealed containers.

Storage: In sealed containers, avoiding heat.
